## ZIPWALL® INTRODUCES HEAVY DUTY ZIPPER

ARLINGTON, MA, August 3, 2009 – ZipWall® LLC. Of Arlington, Massachusetts introduces a new and more durable heavy duty zipper (HDAZ2) that provides easy access in and out of the ZipWall dust barrier.

The improved 7 foot long zipper is constructed from a single, wider piece of fabric. This eliminates the stitching required to join the adhesive strips to the zipper. This new single piece design improves reliability by eliminating the stitching that could pull apart under heavy or rough usage. The single piece of release paper also makes it fast and easy to apply. The zipper features a very aggressive adhesive that keeps it in place even at high traffic jobsites. The adhesive is also rated for use down to 32 degrees. Additionally, the zipper offers very smooth glide action. The included ZipWall Zipper Knife is used to cut an opening in the plastic sheeting and removes a 3/4" strip of plastic so the teeth can not bind as you open and close the doorway.

This heavy duty zipper is packaged two to a box at \$18.95, including a zipper knife.

The ZipWall zipper available from a growing list of selected dealers, listed on the website at [www.zipwall.com](http://www.zipwall.com). For further information, contact the manufacturer at 1-800-718-2255 or visit the company's website.
