**ZipWall Introduces the ZipHook Accessory**  
**Hang gear and clothing from any ZipWall Spring Loaded Pole**

ARLINGTON, MA, September 20, 2008-- ZipWall LLC. of Arlington, Massachusetts

The new ZipHook™ is a handy accessory to help you keep things organized and off the floor. Just clamp one to any ZipWall SLP pole and you're ready to go. The ZipHook™ is a great way to keep tools, equipment and clothing off a dusty work site floor. Each ZipHook™ can support 40 lbs.

Use the ZipHook™ to keep cables and hose off the floor as required by code when doing renovations in hospitals or medical facilities.

If you're an electrician, the ZipHook™ is a great labor savor when wiring for new construction. Mount them to SLP poles and use these to hold wiring in position while you tie it into a distribution panel.

Tired of your bikes taking up valuable floor space? The ZipHook™ mounted to an SLP pole is a great vertical bike rack. Hang 2 bikes per pole and take back lost floor space. Since this bike rack portable, you can move this bike rack to where ever you need it, or take it with you to keep your bikes safe when you're on a vacation.

The ZipHook is available from a growing list of selected dealers, listed on the website at [www.zipwall.com](http://www.zipwall.com). For more information, contact the manufacturer at 37 Broadway, Arlington, Massachusetts: **800-718-2255** .
